How would I read this file in java to extract the first

item in the tuple? Also, can this file be loaded dynamically so that I don't have to hardcode the number of entries in the file?

A: Well, if you have the file in a file and the file only contains tuples, I think you can just read the file and make your own list of tuples. For example: `List tuples = new ArrayList();` `BufferedReader reader = new BufferedReader(new a1d647c40b`

Navigate the parameters in new ways. Use the new Link Parameters dialog to automatically create links to existing objects and to allow users to dynamically update the parameters of linked objects. (video: 2:32 min.) Implementing new commands: Use new commands to make your applications more flexible, dynamic and intuitive. Make complex workflows easier to understand. Show where your design fits in a timeline. (video: 2:55 min.) Holograms: Visualize your designs in 3D. Add a holographic look to your models to convey important information, such as scale, object thickness, display areas, relationships, etc. Use the new 3D Hologram tool to quickly visualize your designs in 3D. Use Hologram Format to apply a custom 3D hologram to your drawings. Reclassify: Organize complex drawings using the Reclassify command. Select individual objects, groups of objects or even entire drawings, then create new colors based on logical rules for different object types. Quickly group objects based on their classifications. (video: 2:24 min.) Join: Organize multiple drawing files together into a single project file. Use Join to connect drawings together, merge attributes, add in relationships and create layers for collaborative work. Direct Link: Send commands to a linked application directly without additional steps. Add or change information in your drawings and then send the changes instantly to linked applications. Multileaders: Simplify complex design hierarchies using Multileaders. Add multiple levels of flexibility to your drawings to meet the needs of both designers and users. Use link controls and multileaders to make objects more versatile, dynamic and intuitive. (video: 1:37 min.) Subscription Lists: Improve the accuracy of your schedules. Use the new Subscription Lists to automatically create and update repeating schedules, including schedules for groups of commands. (video: 1:25 min.) Symbols: Reuse symbols.
