## What's new in VEHICLES FURY:

- Chase Raven Clover and her best friend Jamie-Lynn faked an illness to get on the space shuttle that would transport her from school to home. She got the best of marks in her school exams and her parents seemed delighted. But things that should have been smooth sailing became anything but. Something about being in space though put her mind in a different place and she had a traumatic lucid dream that is still with her but will it ever come to light? Let's find out! JC: Greeting, my name is Jakob Chocoff and this is Chase Raven, a collection of short stories and articles which cater for all kinds of readers and all kinds of readers. I hope you enjoy it. One of our main characters is Scorpius. She has been severely bullied and abused through life but one day, her dog being lead into safety by some good human beings it will change her life forever. Sounds familiar? You read the book? Or maybe you found yourself loving the book, right at the beginning, but ending up finding yourself reading two pages at a time (or even a couple of paragraphs at a time) before nodding out for a while. I hope you both happy and disturbed at the same time. It's called Clover and the Space Doghouse. \*\*\* The Astro-Pod finally settled on the space shuttle. The teacher who was in charge, Marie Denham said "Quit your worrying little sandwich and get to your books girls." Life was about to change. Everything was about to change. For Chase, her anxiety kicked into overdrive when Marie turned to all of the girls and said "Now that your leaving us as part of Project Moon, I have something to say." The whole class turned her way. Chase was so nervous her legs were shaking and in a panic she took a step towards her friend. Unfortunately, it was too late as Jamie-Lynn wrapped her arms around Chase's waist which made the trick that much worse. "Chase, go sit down." Jamie-Lynn spoke in a gentle voice while giving Chase a glare that came across as menacing. "Uh..." Jamie-Lynn left no option with her words. Chase was forced to sit in a way she hated herself for doing so.

We each had a unique take on our respective genre, while trying to include the aspects of other genres, such as platformers or RPGs. Also, as SoulSet is a shooter, we had to fit our own brand of action into that genre. While making sure to stay true to the old-school action shooter, we wanted to make it unique, so we've been working on that for the past 2 years, on and off. Of course, this gameplay means you'll be shooting a lot, and we wanted to give that feeling, in a way, by making the game feel more physical and tactile. Of course, all this comes at the price of huge production time, and tons of animation, for each new level. But after 2 years of work and learning, we are very proud of the final product. We hope you enjoy playing the game and that you can
