A: From this link: In PHP 5.5 and later, you can use functions such as `fgetcsv()` and `fread()`, which can be used for line-based reading instead of a loop. In other words, this is a new function that reads one line at a time. This is not a solution, but it might give you the right direction. Typical of the study of the Renfrewshire Football Association (RFA) (Ido Ben Zaken) Renfrewshire FA & West of Scotland Football League A challenge for a Renfrewshire FA Executive The Renfrewshire FA Executive is the professional body that represents football in Renfrewshire. In recent years the FA Executive has faced a number of challenges, but remains committed to providing the high standard of football that its constituents enjoy. As the body responsible for developing and running the league structure, the Executive has direct influence on how football is administered within the sport within the Renfrewshire Football Association. This includes the ability to limit the number of clubs in the top flight and the promotion of the sport in Renfrewshire. The Executive has recently published its Strategic Plan for the period 2014-2018, which outlines areas of focus that will help to enhance the football experience within Renfrewshire. Member benefits The Executive are committed to enhancing the game in Renfrewshire by providing its members with the following benefits:-Q: Get `HtmlResponseStream` from `HttpRequest` I'm trying to convert a `HttpRequest` into a `HtmlResponse` stream so that I can process it further. I have the following code: using `(WebResponse response = req.GetResponse()) { StreamReader reader = new StreamReader(response.GetResponseStream()); HtmlDocument doc = new HtmlDocument(); doc.Load(reader); return doc.Body.ToString(); }` When I run this code I get an Exception: "The remote server returned an error: (404) Not Found." What am I doing wrong? The URL I'm trying to retrieve is valid (It redirects), and I can see the code is trying to retrieve it just fine. A: The problem was I was making my request with an `HttpRequest`, but I was `c6a93da74d`
