## What's New in the?

InfoPro is a comprehensive free-form information manager that aims to provide you with the perfect blend between what a database manager and a word processor would offer you, in one single package. User-friendly task manager with a streamlined workflow In other words, InfoPro is a

piece of software created to help better organize tasks by offering you the means to handle pieces of data from to-do lists all the way up to complex notes. The application follows a simple and surprise-free installation process, while its usage resembles standard word processors and should not pose any kind of difficulty, even for users with little computer experience. Every feature you need to keep organized can be found in the toolbar. The utility's main window offers you direct access to most of the app's features, many of them found on the all-encompassing toolbar. While most features are

within arm's reach, working for long periods with this app could prove to be a bit tiring for your eyes, as its interface might seem a bit cluttered and its icons a tad too small. As far as its word processing capabilities are concerned, you should not be worried, as InfoPro packs almost everything you would need from an app of this sort. You can format your text in a bunch of different ways, add tables, edit fonts and even add metadata. Packs word processing and basic database management features In addition, the utility also comes with a syntax highlighting engine, support for extensive bullets

and numbering, as well as the ability to embed OLE objects. Also, InfoPro makes it possible for you to define your own page settings, compress your files into ZIP archives for backup and restore your information using them. Besides its obvious word processing functionality, InfoPro comes with integrated file search, print preview with PDF support, extensive import facilities and basic picture editing capabilities. A very approachable and quite different information manager As a conclusion, InfoPro is a streamlined and efficient piece of software that aims to break free from the pattern of most apps of

this sort by providing  
database management  
capabilities and word  
processing features,  
alongside an open  
environment that does not  
limit you in any way. ]]> 11
